### Company Overview

With over 17 years of supply chain experience, Savi Technology is the proven leader in RFID solutions that deliver value through real-time visibility, asset management, consignment and shipment management, inventory optimization, and global supply chain visibility and security.

Since the late 1990's, through investments in research, development and technology acquisitions, Savi has designed and developed fifth generation SmartChain® software suite including a unique enterprise software platform, Savi SmartChain® Enterprise Platform, Savi's RFID, site software and enterprise software applications that provide the foundation for our supply chain asset management, consignment management, transportation and security management solutions. Our applications are uniquely integrated with other automatic identification and data collection (AIDC) technologies including bar code scanning, passive RFID technologies.

Savi's sixth generation EchoPoint™ active RFID technology is recognized for its leadership in supply chain solutions. Savi's range of readers, tags and signposts have been implemented in the harsh environments found in global supply chains including the arctic, deserts and maritime environments. Savi's unique hardware offering includes a broad range of active RFID tags: asset tags, data rich high performance tags and sensor tags that monitor security and environmental conditions.

Savi has more than fifteen years experience implementing solutions around the world that have been proven to enhance operational efficiency, deliver substantial cost savings, reduce capital investment in supply chain assets and optimize inventory levels. The company is the primary technology provider for the world's largest RFID consignment monitoring network for the U.S. Department of

Defense, which employs RFID, barcode, cellular and satellite communications systems to track more than 35,000 conveyances daily across a global network of 1400 locations in more than 45 countries.

Founded in 1989, Savi Technology is a wholly owned subsidiary of Lockheed Martin,, with headquarters in Mountain View, California and offices in Johannesburg, London, Melbourne, Singapore, and Washington D.C.

Headquartered in Bethesda, Md., Lockheed Martin employs about 140,000 people worldwide and is principally engaged in the research, design, development, manufacture, integration and sustainment of advanced technology systems, products and services. The corporation reported 2006 sales of \$39.6 billion. For additional information, visit [www.lockheedmartin.com](http://www.lockheedmartin.com)
