**Vice President and Director,  
Technology and New Economy Project**

**Progressive Policy Institute**

**[www.pponline.org](http://www.pponline.org)**

The New Economy in Indianapolis

# The Progressive Policy Institute

- Founded in 1989 by the Democratic Leadership Council
- 501 (c) (3)
- Mission is to define and promote a ‘Third Way’ progressive politics for the Information Age
- An alternative to the liberal impulse to defend the bureaucratic status quo and the conservative bid to dismantle government

The New Economy in Indianapolis

# **“The New Economy”**

The New Economy in Indianapolis

- **A New Economy Has Emerged**
- **There's No Going Back**
- **It Will Affect All Regions And Communities**
- **It Will Change The Nature And Practice Of Economic Development**

The New Economy in Indianapolis

**The New Economy is a knowledge and idea-based economy where the keys to wealth and job creation are the extent to which ideas, innovation, and technology are imbedded in all sectors of the economy.**

**The question to ask is not “do we have ‘New Economy’ industries,” but rather, “are our industries New Economy?”**

The New Economy in Indianapolis

# Economist Joseph Schumpeter Described His Era's (1940's) New Economy

---

< “*These [economic] revolutions periodically reshape the existing structure of industry by introducing new methods of production -- the mechanized factory, the electrified factory, chemical synthesis, and the like; new commodities, such as railroad service, motorcars, electrical appliances; new forms of organization -- the merger movement; new sources of supply -La Plata wool, American cotton, Katanga copper; new trade routes and markets to sell in and so on.*”

The New Economy in Indianapolis

# Today's New Economy Transformation is Just as Profound

---

< *These revolutions periodically reshape the existing structure of industry by introducing new methods of production -- the networked office, computer-aided manufacturing, biotechnology production and the like; new commodities, such as the Internet, cellular telecommunications, the PC; new forms of organization -- the venture capital movement; the rise of “high-performance work organizations”; the growth in business alliances and partnerships; and new sources of supply - high-skilled H1-B immigrants, solar power; new trade routes and markets to sell in (Nafta, Asia) and so on.*

# A New Economy Requires a New Economic Policy

**OLD ECONOMY  
MODEL**

Get Big

**NEW ECONOMY  
MODEL**

Get Prosperous

Get Cheap

Get Better

The New Economy in Indianapolis

# The Old Economy Model: Getting Big

< **Getting big meant trying to get more jobs and companies even if:**

- **the jobs were bad, and**
- **the region was choking from growth (high housing prices, air pollution, shortage of workers, traffic gridlock)**

# The Old Economy Model: Getting Cheap

- < **Getting cheap meant tax holidays, big subsidies and other giveaways to companies that only cared about cost.**
- < **The result were low wage jobs and companies that were just as likely to leave after a decade for even cheaper pastures.**
- < **For example, almost half the jobs of companies in one Midwestern city that got tax subsidies paid less than 8\$ per hour.**

The New Economy in Indianapolis

# The New Economy Model: Getting Prosperous

< **Getting prosperous means focusing on creating jobs with higher wages and better working conditions, reducing poverty and increasing economic opportunities for all of the region's citizens.**

The New Economy in Indianapolis

# The Old Economy Model: Location, Costs, and Resources

## The American Ruhr!

... developing the world's greatest concentrations  
of industrial power ... home of the nation's  
largest inland energy plant, "Prairie" suffice for  
1% of 1% of Indiana manufacturers' total production  
needs.

Circle Eleven counties cover four-county freight rates  
the Indiana-Central Indiana "Ruhr" developed  
since 1946—now extremely favorable rates  
are available to those who are small and enter-

**NO STATE DEBT.** Our State Constitution forbids it. Indiana has millions of dollars in surplus.

**NO "REVENUE" OR "PENALTY" TAX.** We are known, not taxed, incorporated or manufactured here! NO tax on income from sales, or services or foreign-owned! Only 1% of all net gross receipts from sales for processing, retailing, etc., enter the Indiana state treasury; 1% net sales proceeds retained by Indiana except taxes under an ultimate assessment (1% of 1%), and Indiana's assessment rate is far below state average!

**RAW MATERIALS.** Low-cost coal, limestone, natural gas, "Clay Capital of the World," Potash, White Clay, oil, natural gas, gypsum, rock asphalt, dolomite, fluorite, lime, sand, gravel, wood, stone, asphalt, etc.

**23 RAILROADS, 300 MOTOR FREIGHT LINES.** In addition, 200 airports, more miles of paved highway per capita and per square mile than any other state—and still growing!

**GOOD LABOR.** Responsible, versatile, OSHA-positive, job placement service for anyone who wants it. Enclosed application enclosed.

**AND IT'S GOOD TO LIVE IN INDIANA!** Suspended subsidies; 200 more local colleges, universities. This including pre-collegiate, prep, lower-class music and local government. Good climate. Good business, building, transportation. Over 1000 lakes, streams; 142 thousand acres parks, forests, beaches, rivers. Weather reported from public weather stations, pencils, guides, playgrounds, good schools, kind people, generous people!

## The New Economy Model: Getting Better

< **Getting better means boosting the skills of the region's workforce, ensuring a technologically advanced infrastructure, fast and responsive government, and ensuring a high quality of life that will be attractive to knowledge workers.**

The New Economy in Indianapolis

## **What To Do:**

- **Help companies get skilled workers**
- **Help Companies Access Technology**
- **Foster a Climate of Innovation**
- **Encourage a Robust IT Infrastructure**
- **Boost Quality of Life**
- **Foster New Economy Governance**

The New Economy in Indianapolis

**Metropolitan regions that  
meet the challenges of the  
New Economy focusing on  
innovation, learning, and  
constant adaptation... will  
be the ones that succeed  
and prosper.**
