

1992 – Earth Summit was the kickoff for mass mobilization of Non-Governmental Organizations, Universities and Corporations that stood to profit on a scale never before seen in the history of the world. That would of course, be the communications and technology corporations. The product of the Earth Summit was Agenda 21.

Agenda 21 is not just about the environment. It is about -

- Trade policy - for redistribution of wealth – transfer of wealth to “developing countries”
- Social policy – values and beliefs, social education, changing consumption patterns
- Economic policy – global redistribution of wealth including production
- Global Central Planning and Resource Management - including “human management”
- New Financial & Monetary System – vapor trading, consumption taxes, cost based on energy inputs

Agenda 21 is asymmetric warfare against our country and the people of the United States.

- Mask of environmentalism
- Foreign Concepts presented using familiar words for deliberate deception
  - Self-Government
  - Sustainable Development
  - Free Trade
  - Knowledge Economy
  - Smart Growth
  - High Performance Education

Agenda 21 is a comprehensive, highly sophisticated, strategic plan for the implementation of “global governance” with the United Nations Soviet System at the center.

- Regionalism
- Non-Governmental Organizations supposedly representative of interests
- Inter-governmental committees, commissions and councils
- Privatization – corporate takeover of government functions

"We cannot leap into world government in one quick step ... [T]he precondition for eventual globalization - genuine globalization - is progressive regionalization. Because thereby we move toward larger, more stable, more cooperative units." **Zbigniew Brzezinski**, former US National Security Adviser (1977-1981) 1995
