INTRODUCTION

This is the season of America's renewal.

Already, in the first few months of his new Administration, President Bill Clinton has restored an active purpose to the Presidency, and renewed America's commitment to change and progress.

We now have a President dedicated to investment and economic growth; a President determined to help Americans weather the winds of change; a President committed to restoring responsibility; a President devoted to returning the government back to the American people.

After twelve years of national drift and economic decline, President Clinton has charted a clear path to growth with his New Directions economic plan designed to create jobs, boost incomes, move our economy from consumption to investment, and reduce our deficit, substantially and dramatically.

The investments in the Clinton economic plan embrace priorities that will raise the living standards and profits of workers and businesses for the long-term: rebuilding America's infrastructure; committing resources and attention to the education and training needs of our students and workers; and restoring vital incentives that reward productivity, profits, innovation and investment.

The Clinton budget -- the outline of his economic plan for New Directions -- passed the Congress in record setting time. It reduces deficit spending by over $500 billion; a plan so credible that the markets continue to reduce interest rates on the American people. These interest rate reductions, coupled with imaginative steps taken by the Clinton Administration to deal with the credit crunch, means American businesses, farms, and consumers have money to save, spend, invest and grow.

We now have a President who helps the American people make the choice for change.
Enormous changes are sweeping our economy. Inevitable defense cutbacks are forcing military bases to close?they're causing defense manufacturers to lose markets and cut jobs. Problems in the airline industry have caused massive lay-offs in aerospace firms and among the domestic carriers. America's economic partners abroad are beating American companies in the race for markets in the former Soviet Union.

That's why President Clinton's economic program will help the American people take advantage of these changes. He has offered a $20 billion, five-year initiative to reinvest in workers, communities and companies harmed by cuts in military spending. He has formed a task force to recommend real changes in Federal policy to help restart our aviation and aerospace industry. And he has provided an enterprise-oriented aid initiative to save the Russian Democracy and spur American economic growth.

Beyond growth, Americans want a return to responsibility in our schools, our communities, and our economy. And in that spirit, President Clinton is leading the way. By reforming welfare to make it a second chance, not a way of life; by reforming the health care system to provide health security to every American and bring rising costs under control; by making national service opportunities available to students so that they can exchange opportunities for education with community service.

Finally, President Clinton is working to give the government back to the American people. At the beginning of his Administration he announced his decision to cut the White House staff by 25%, and to eliminate the kinds of perks and privileges which isolate federal workers from the people they are supposed to serve.

He has cut billions from the budgets of Federal Agencies and Departments, telling them they must do more with less. He is committed to reinventing government and bringing his Presidency directly to the people through town meetings, electronic mail with the White House, and ideas like the Forest Conference?which enabled the environmental and economic problems of the Pacific Northwest to be discussed by average people with the President, Vice-President Gore and Members of the Cabinet.

Most important, he is committed to enacting tough campaign finance and lobbying reform legislation to drive special interest dealing out of politics.

What follows is a chronology from the first 100 days of the most action oriented Administration in our memory. But it is more than a listing of accomplishments, because now is not the time to be satisfied. Instead, it is indicative of a change in direction.

What will come from what we accomplished here -- more economic growth, comprehensive health and welfare reform, a new system of national service, and the like -- is new opportunities for achievement, empowerment and progress for middle-class Americans, and a new direction for us all. It is indeed America's season of renewal.

**HISTORICAL FOOTNOTE**

The "hundred days" period was applied by journalists to the special session of the 73rd Congress, which granted newly inaugurated President Franklin D. Roosevelt extraordinary powers to combat the national crisis of the Great Depression in 1933.
Less well-known than the hundred days of 1933, is how Woodrow Wilson set a modern precedent in 1913, when one month after taking office, he became the first President in a century to deliver an address to Congress. That speech initiated the sweeping economic reforms enacted later that year -- tariff reform, the first income tax and the Federal Reserve. With that early speech, Wilson had closed the book on the Gilded Age and had shifted Government to the side of average, hard working Americans.

Day 1: January 20, 1993

Inaugurated as 42nd President of the United States.

Delivers Inaugural Address from the steps of the Capitol.

Issues Executive Order on Executive Appointee Ethics; order restricts or limits ways in which senior executive appointees may profit in the future from their experience while serving the President.

Proclaims a National Day of Fellowship and Hope.

"Our Democracy must be not only the envy of the world but the engine of our own renewal. There is nothing wrong with America that cannot be cured by what is right with America.

This beautiful Capital, like every capital since the dawn of civilization, is often a place of intrigue and calculation. Powerful people maneuver for position and worry about who is out, who is up, who is down, forgetting those people whose toil and sweat sends us here and pays our way. Americans deserve better. ... Let us resolve to make our Government a place for what Franklin Roosevelt called 'bold, persistent experimentation,' a Government for our tomorrows, not our yesterdays. Let us give this Capital back to the people to whom it belongs.

Yes, you, my fellow Americans, have forced the spring. Now we must do the work the season demands."

Inaugural Address

Day 25: February 13, 1993

Saturday radio address on the economic plan.

Day 27: February 15, 1993

Address from the Oval Office on the economic plan.

"All during this last 12 years the federal deficit has roared out of control. Look at this: the big tax cuts for the wealthy, the growth in Government spending, and soaring health care costs all caused the federal deficit to explode... Now if all that debt had been invested in strengthening our economy, we?d at least have something to show for our money: more jobs, better educated people, a health care system that works. But as you can see, while the deficit went up, investments in the things that make us stronger and smarter, richer and safer, were neglected: less invested in education, less in our children?s future, less in transportation, less in local law enforcement. ...The price of doing the same old thing is far higher than the price of change."

? First televised address to the Nation from the Oval Office.

Day 28: February 16, 1993

Addresses California Economic Conference via teleconference.

Visits construction site, Washington, D.C., to discuss jobs and infrastructure.

Day 29: February 17, 1993

Delivers address to Joint Session of Congress on the economic plan.

Meets with bipartisan Congressional leaders prior to
address.

"Our Nation needs a new direction. Tonight I present to you a comprehensive plan to set our Nation on that new course."

"I know this economic plan is ambitious, but I honestly believe it is necessary for the continued greatness of the United States. And I think it is paid for fairly, first by cutting Government, then by asking the most of those who benefited the most in the past, and by asking more Americans to contribute today so that all of us can prosper tomorrow."

"The test of this plan cannot be 'What is in it for me?' It has got to be 'What is in it for us?' If we work hard and if we work together, if we rededicate ourselves to creating jobs, to rewarding work, to strengthening our families, to reinventing our Government, we can lift our country's fortunes again."

? Address before a Joint Session of Congress

Day 38: February 26, 1993

Delivers first major foreign policy address, on the subject of American leadership in the global economy, at American University, Washington, D.C.

"For years our leaders have failed to take the steps that would harness the global economy to the benefit
of all our people, steps such as investing in our people and their skills, enforcing our trade laws, helping communities hurt by change; in short, putting the American people first without withdrawing from the world and people beyond our borders.

The truth of our age is this and must be this: Open and competitive commerce will enrich us as a nation. It spurs us to innovate. It forces us to compete. It connects us with new customers. It promotes global growth without which no rich country can hope to grow wealthier. It enables our producers who are themselves consumers of services and raw materials to prosper. And so I say to you in the face of all the pressures to do the reverse, we must compete, not retreat."

House of Representatives passes Budget Resolution, basic outline of the economic plan.
Addresses employees of the U.S. Treasury Department on the economic plan.

Meets with Commission of European Communities President Delors.

Addresses Radio and Television Correspondents Association Dinner.

"I want to thank all of you for the work that you do. I think you have a difficult job. Each of us sees the world in different ways and the whole complex interplay of the press and people in public life is designed somehow to give the American people a kaleidoscope of opinion, a mountain of facts organized in ways that will enable them to grasp it, so that somehow they ? not you or me ? they can be the main actors in the great American democracy."

"I ask that in the months and years ahead you stay faithful to yourselves and to your cause. Never lose your sense of humor. And remember that most of us who do this on both sides do it because we love our country and prefer to believe that an effort made today can make it better tomorrow. It?s a good way to live a life."
