In June 2004, the Small Business GWAC Center awarded an Information Technology 8(a) set-aside contract vehicle to replace the 8(a) FAST GWAC that expired in October 2004. One of the major changes from 8(a) FAST is an expansion from one functional area to eight based on the North American Industrial Classification System (NAICS). These functional areas include services such as computer programming, computer facilities management, computer systems design, data processing, and facilities-based telecommunications. 8(a) STARS is a seven-year contract, with a three-year base period and two, two-year option periods.

8(a) STARS (Streamlined Technology Acquisition Resources for Services) provides a full range of IT solutions—including application development, computer facilities management services, and information assurance—through small disadvantaged 8(a) firms.

As an 8(a) set-aside, this contract vehicle provides small businesses historically left out of the procurement process with a chance to compete in the federal marketplace. GSA customers benefit by having access to a portfolio of more than 400 award-winning industry partners distributed across eight areas of expertise. Federal agencies also receive 8(a) and other small business credits toward their procurement preference goals through the use of these contracts.

>> 8(a) STARS GWAC

Functional Areas TELESIS Holds under this GWAC include:

- >> FA 1: Customer Computer Programming Services
- >> FA 2: Computer Systems Design Services
- >> FA 3: Computer Facilities Management Services
- >> FA 4: Data Processing, Hosting and Related Services
- >> FA 5: Other Computer Related Services
