

## The Conclusion

### Refugees as a Weapons System – Part 11

The conclusion of Refugees as a Weapons System is that the creation of refugees is the real objective and the real war on the American people. All that needs to happen for a country to unload its excess and/or undesirable populations is to create a scene and get the media to cover it. Of course the UN is always there for any “humanitarian disaster” and it is the UN that has the authority under international law to designate who qualifies as a refugee. The United States is then obligated to take the people in and they are resettled in our communities.

Obviously, any country that wants to wage war on the United States could also participate in this strategy to get their warriors here on our soil as refugees. This is exactly what is happening with the Muslims being imported and settled into our communities.

[Israeli PM: We Kill Palestinians Because Hamas Wants 'Telegenically Dead'](#)

According to [Madeleine Albright](#), Syria is going to produce the largest refugee crisis in 70 years. And the news is full of stories and pictures of Al Qaeda, Dash, ISIS – made for TV stories of rape, kidnapping and enslavement of women... oh the horror of it all.

In the senate hearing where Madeleine Albright made the statement about the refugee crisis, Henry Kissinger also made an interesting statement. He said that for a long time, the international community thought that the structure of the nation-state system was the cause of war and now it seems that the disintegration of the nation-state system is causing war. That's proof positive that the “international community” are a bunch of over-educated idiots who live in a bubble. They've been breathing their own methane for too long.

While I'm on the subject of the "international community", it was built largely with Carnegie money – the Carnegie Endowment for Peace at the turn of the twentieth century. Most Americans did not have the sophistication to understand the depth of depravity and treachery of Europeans – and in particular, the depravity and treachery of the elite of the British Empire. Carnegie did something else that was brilliant. He built the institutional structure for the schools – and Carnegie still controls school policy. They took over the U.S. State Department and then they defined the standards and credentials for international relations. If you control the standards and the education required for a government function, then you control that function – and Carnegie dominates the U.S. State Department which is why the State Department doesn't work for the American people. In fact, this whole refugee system reveals the State Department to be the enemies of the American people – working from the inside.

In effect, American taxpayers are paying to destroy themselves. It's a brilliantly evil strategy and the people who are participating are both making money and feeling good about destroying their children's future. Unreal.

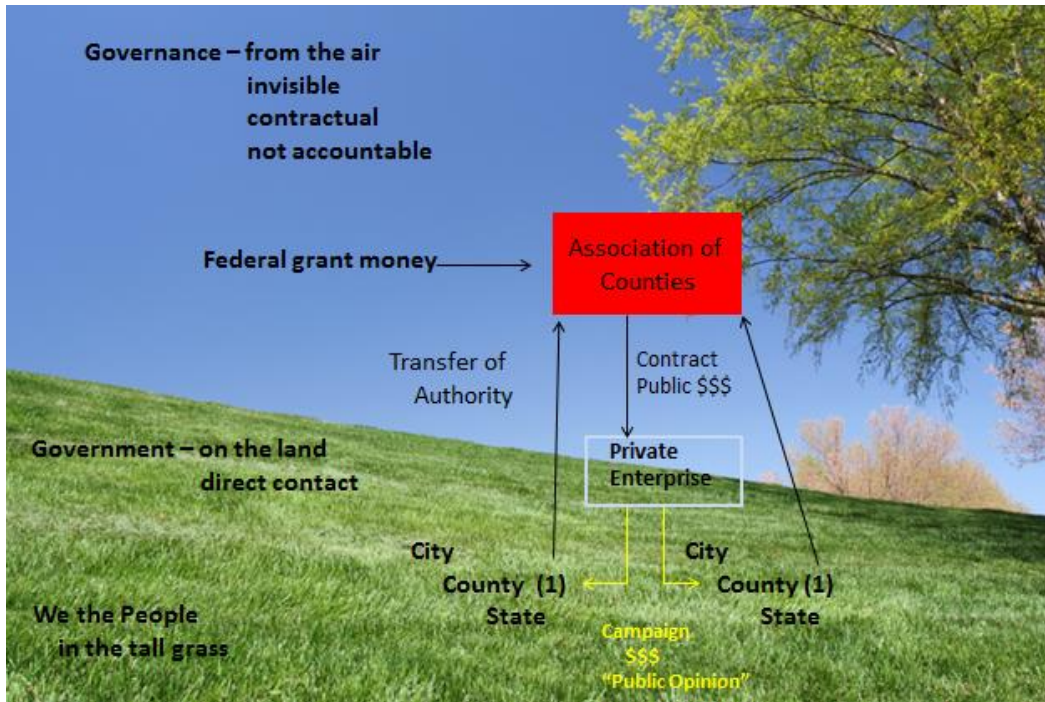

John F. Kennedy was assassinated in 1963. In 1965, Lyndon B. Johnson who started out his career as a teacher, appointed John W. Gardner who was then head of the Carnegie Corporation of New York and the Carnegie Foundation for the Advancement of Teaching to be the Secretary of Health, Education and Welfare (HEW). From that perch, Gardner was the architect of the "Great Society".

It was in 1965 when the government began requiring and funding privatized commissions to implement public policy in effect, building a network of well-funded, empowered individuals in a system that serves only the people involved in it. The first instance that I found was the Public Works and Economic Development Administration (PWEDA). The Economic Development offices in our local communities get federal funds to implement federal policy but they are independent agencies not visible to the public and not accountable to anybody. Every organization listed below is set up in the same corrupt structure.

## Governance - Organizational Structure

- ❖ Privatization
- ❖ Management of government functions by contract and by regulation
- ❖ Independent Agencies
  - Contractors
  - Federal Money
  - Federal Programs
- ❖ **Regional Organization – County Level - Idaho - Federal/UN Agenda**
  - Economic Development (1975)
  - Public Health (1974)
  - Metropolitan Planning Organization (1977)
  - City/County Planning & Zoning (1996)
  - Sheriffs – Emergency 911 \*\*\* **Fusion Centers**
    - Includes Fire & Hospitals
  - Schools – in progress

I'm not much of an artist, but I tried in this graphic to show the functional structure:

It's not a coincidence that I found the same "self-governing" structure when I was doing the research for what I called, "[Smart Grid: Rest of the Story](#)". This system of so-called self-governing is modeled after the medieval livery company system of the City of London and it's the structure that built the British Empire (See Part 9, Woolf at the Door). It is an inherently corrupt system of entrenched privilege and wealth. People think that gerrymandering is the problem with our elections system. It may have been gerrymandering in the 1950s and 60s. Today the problem is the functional design of this self-serving network of corrupt individuals operating at the county level where the candidates are selected and the federal-to-private hands in the community that pays for it.

It's the functional organization of how federal money comes into the states to implement federal policy and programs that is the corruption. As it pertains to the refugee resettlement program, US participation in the internationally binding United Nations Protocol on the Status of Refugees and the "[independent sector](#)" – Church Lady Mafia that was designed by John Gardner for the Carnegie Foundation that is the network of treason against the Republic.

I see big revenues in their future when cities and counties have to hire them to fight the Muslims that have been brought into the U.S. I would invest – except that blood money is dirty money – but that won't bother the Church Ladies or our county political machines. There is profit on both sides for them.
